SUMMARY

Strategic Technical Lead with a track record of rapid career advancement through high-impact delivery and analytical excellence. Expert in architecting scalable systems and leading cross-functional teams to solve complex technical challenges. Consistently recognized as a critical team resource for driving technical strategy and delivering high-performance solutions in healthcare sector.

WORK EXPERIENCE

CITIUSTECH

October 2020 – Present

- **Technical Lead (Oct 2025 – Present):** Spearheading full-stack architecture for high-stakes healthcare modules. Serving as the primary technical point of contact, mentoring agile teams, and recognized with multiple client appreciations for resolving critical system bottlenecks and driving architectural excellence.
- **Senior Software Engineer (Oct 2023 – Sep 2025):** Orchestrated the migration of legacy enterprise systems to modern frameworks, achieving significant performance gains. Leveraged deep analytical skills to optimize codebase efficiency, leading to early promotion for consistent high-quality contributions.
- **Software Engineer (Apr 2022 – Sep 2023):** Entrusted as the Frontend Lead for Independent Blue Cross, successfully managing the transition of their ecosystem from Kony JS to Angular/Java while maintaining high development velocity.
- **Software Engineer Trainee (Oct 2020 – Mar 2022):** Rapidly mastered enterprise workflows, collaborating on global mobile implementations and establishing a foundation for fast-tracked growth within the organization.

FREELANCE

July 2020 – September 2020

- Delivered custom software solutions for various clients like ERP softwares, web applications, etc.

SCROLLRIGHT

Software Engineer | July 2020 – September 2020

- Frontend development in ReactJS for Phase 1 of a dynamic web app named Cobalt, implementing dynamic pages and website additions.

PLEXUSMD

Intern | January 2020 – June 2020

- Frontend development in ReactJS for the official website, optimizing for SEO.
- Deployed a Rocketchat instance using Nginx for enterprise communications.

PROJECTS

Analyzer (Advanced Dashboard): Full stack PWA for comparative analysis of apps from Play/App Store.
Angular, NodeJS, SQL

Mobile Plugin Integrations (Forgerock, Medallia & Apple Wallet): Architected multifactor authentication workflows using Forgerock, Medallia for customer feedback and app ratings improvement for apps, synced dynamic ID cards to Apple Wallet.
React Native, Capacitor, Angular, Java, Kotlin, Swift
